

Refurbishment of brick masonry

Exercise

After the participants learned about various damages of brickwork and discussed possible causes it is now time to find appropriate restoration methods. Hereby the restoration proposals of the PPT presentation should be considered and discussed.

- Alternative 1: The participants work in the plenary together with the teacher.
- Alternative 2: The participants work together in small groups without the teacher. This alternative is more suitable for advanced learners. If desired the list can be used without the comments on the causes to increase the level.

Material:

- Photos on sheets printed in colour of exercise 1.3
- Results of exercise 1.3
- PPT presentation with restoration proposals
